

Annual General Plant Sale, 9 A.M. Saturday, April 26, 2014

Garage, Vineland Research & Innovation Centre, Victoria Avenue, Vineland Station

Description of Plants to be Available

Evergreen Azalea 'Cherry Drops' —Mid- season. The result of a cross between 'Hahn's Red' x 'Ward's Ruby'. This compact grower with densely branching habit boasts lightly frilled, cherry-red blooms and glossy, deep green leaves. This is a gem..

Evergreen Azalea "Cheery Drops" Summer Foliage

Evergreen Azalea "Cheery Drops" Fall Foliage

Evergreen Azalea "Girard's Pleasant White": Compact and low growing evergreen Azalea with lustrous dark green foliage and large white flowers. Azaleas prefer cool, moist and well drained acidic soil with good organic content. Any pruning should be done after flowering.

Evergreen Azalea "Herbert" An [Gable](#) hybrid, blooms in early to early-midseason, with 1-2" hose-in-hose blossoms, hues of red-violets with vivid dark violet flares. A spreading azalea grows low to medium in height. Appears to be tolerant of hot dry conditions, but as all azaleas prefers to be moist well drained soil.

Evergreen Azalea "Herbert": Fall Foliage

Evergreen Azalea Rosebud: True to its name, 'Rosebud' displays blooms whose shell pink tones and double, hose-in-hose structure recall the classic beauty of roses. A slow grower, this tidy azalea is characterized by spreading growth.

Evergreen Azalea Stewartstownian: Developed by Gable in Stewartstown Pennsylvania. A sun tolerant hybrid, it displays lush red blooms that, in the light, appear blood orange. Winter foliage deepens to wine red, excellent for color in the winter garden. Excellent for bonsai, as well.

Deciduous Azalea "Arneson's Gem": (Exbury-Mollis) Warm, golden flowers are edged in brightly glowing orange. The beautiful large blooms make a prolific display, striking when in flower. A good compact grower, yet vigorous, a real gem!

Deciduous Azalea Baltic Amber: Gold yellow, blue silver foliage, fragrant, blooms mid spring, 6-10 ft tall x 6-8 ft wide, full sun to partial shade, hardy to -20F.

Deciduous Azalea "Girard's Border Gem": Dark rose pink, deep green foliage, scarlet in winter, blooms early to late spring, 2 ft tall x 3 ft wide, partial shade, hardy to -15F.

Lepidote "Amy Cotta": From Weston Nurseries. A sport of 'PJM'. Selected by Steve Cotta of Portsmouth Nurseries. Early flowering, compact, slow, dense growing, forming a rounded cushion as wide as high. Small, fragrant foliage, dark mahogany in fall.

Photo of "Amy Cotta" plant follows.

Lepidote ``Amy Cotta`` Plant:

Lepidote ``Checkmate``: Masses of small, lavender-pink flowers bury this dwarf lepidote rhododendron in early spring. This is the most compact form of PJM commercially available. Dark mahogany winter foliage. 2ft. x 2ft. in 10 years.

Lepidote mucronulatum ``Cornell Pink``: Soft pink flowers (with absolutely no magenta) appear in great profusion in late April or early May, preceding the leaves and forming a beautiful cloud. Small delicate leaves turn lovely shades of gold or burnt orange in the fall. Compact habit (4-6ft, and taller than wide) useful in many applications. This is really a very hardy deciduous lepidote.

Lepidote mucronulatum ``Cornell Pink``: Blooms very early in the season. Soft pink flowers appear in great profusion in late April or early May, preceding the leaves and forming a spectacular bright pink cloud. The small delicate leaves turn lovely shades of gold or burnt orange in the fall. The plant's compact habit (4-6ft, and taller than wide) recommends it for a wide range of uses.

Lepidote ``Karin Seleger``: (*R. impeditum* x *R. dauricum*) A Brueckner hybrid. Dwarf spreading rhododendron with dark green foliage and violet-purple flowers in May. Small leaves turn bronze in fall and are retained through winter.

Lepidote ``Karin Seleger`` Plant

Not Available Spring 2014

Lepidote Mary Fleming: Photo taken March 10, 2014, Netherlands.

Not Available Spring 2014

Lepidote “Patty Bee”: (*keiskei* ‘Yaku Fairy’ x *fletcheranum*)

A compact plant heavily clothed with inch long, fir green leaves. In winter the foliage turns a delightful maroon red. When spring arrives, even very young plants will be covered with masses of bright lemon yellow. The flowers are quite large for the plant. It’s a vigorous plant that grows well!

Not Available
Spring 2014

Elepidote “Roadside Bounty” aka **Bodacious** (‘Fanfair’ x ‘Prometheus’ x *forrestii* Repens Group) Large rose red flowers with bright white in the throat. The deep green foliage is dense on this compact floriferous plant.

Not available Spring 2014

Elepidote “Double Besse”: (red *catawbiense* hybrid x ‘Boule de Neige’) gorgeous raspberry-red, hose-in-hose (one blossom inside another), fully double-flowered form of ‘Besse Howells’! Blooms are packed with petals and beautifully formed. Green foliage. Excellent compact mounding habit

Elepidote “Dreamland”: (*[‘Fabia’ x fortunei ssp. discolor x griersonianum x facetum x degronianum ssp. yakushmanum x ‘Jalisco’]* [exact combination is unknown] Small shrub. Slow growing. 1-1.5 metres tall & 0.5 to 1 metre wide after 10-20 years. Leaves held for 3 years.

Elepidote "Dreamland":

Elepidote "Gartendirector Rieger" ('Adriaan Koster' x *williamsianum*) From Hobbie in Germany. Flowers are a creamy yellow with a small red eye. The plant and foliage show its *R. williamsianum* parentage.

Elepidote "Gartendirector Rieger Plant"

Elepidote "Golden Gate" (seedling from *dichroanthum* ssp. *scyphocalyx*) An easy to grow plant that is compact in habit. The flowers look like flames, starting out yellow in the center and blending to orange at the outer edges.

Elepidote "Golden Gate"

Elepidote "Hachman's Belona" (*degronianum* ssp. *yakushimanum* 'Koichiro Wada' x 'Britannia') Compact blooms heavily, covering itself with bright pink flowers that have deeper pink edges. Great foliage with woolly indumentum on the underside of the leaves and on the top of the new growth.

Elepidote "Hachman's Belona"

Elepidote "Hachman's Charmant" ('Hachmann's Diadem' x 'Holger') Hardy large, medium-green foliage. Profuse trusses of 17 to 19 long-lasting, pure white flowers ringed with bright purplish rose.

Elepidote "Hachman's Charmant"

Elepidote "Hachman's Kabarett": ('Hyperion' x 'Hachmann's Diadem') Light lavender flowers with a touch of lilac spotting and darker purple blotch, edged with ruffles. Deep green and very glossy foliage on a compact plant.

Elepidote "Kalinka" : ('Morgenrot' x ['Mars' x *degronianum* ssp. *yakushmanum* 'Koichiro Wada'] Glossy foliage with brown indumentum on a dense, mounding plant with bright red buds. Buds open to flowers of medium rose with pale pink centers and darker rims.

Kalinka Plant

Elepidote “Melrose Flash”: ([‘Scintillation’ x (‘Mrs. A. T. de la Mare’ x ‘King of Shrubs’)] X ‘Holy Moses’) Introduced by Merle Sanders of Roseburg, Oregon has yellow-green flowers with "flashy" purplish-pink margins. Very showy with delightful foliage.

Elepidote “Polarnacht”: (‘Turkana’ x ‘Purple Splendour’)
Very deep dark purple flowered plant, almost twice as wide as high. White stamens and dark red spotting in the throat set off flowers.

Elepidote “Rimini”: ('Goldbukett' x 'Nippon') This is Hachman’s Rimini . . . not to be confused with Rothschilds Rimini. One metre after 10 years.

		<i>R. caucasicum</i>	x <i>R. ponticum</i>

Helleborus “HGC Pink Frost” (Lenten Rose) Light pink and white, burgundy buds, silver green foliage, blooms late winter to early spring, 1 ft tall x 2 ft wide.

Helleborus “Onyx Odyssey”:

(Lenten Rose) Black purple, purple foliage, large blooms, moderate growth rate, blooms late winter to early spring, 2 ft tall x 2 ft wide

Helleborus “Peppermint ice”

(Lenten Rose) (Winter Jewels) Soft to medium pink, peppermint veins, slow growth rate, blooms late winter to mid spring, 1.5 ft tall x 2 ft wide

Helleborus “Rose quartz”

(Lenten Rose) (Winter Jewels) White, rose picotee edge, slow growth rate, blooms early to late spring, 1 ft tall x 1.5-2 ft wide

Paeonia Suffruticosa HANAKISOI

(Tree Peony) Apricot pink, soft pink edge, semi double, fragrant, moderate growth rate, blooms late spring to early summer, 4-5 ft tall x 3 ft wide

Paeonia Suffruticosa SHIMANISHIKI(Tree Peony) Red purple, streaks of white in spring, semi double, fragrant, moderate growth rate, blooms late spring to early summer, 4-5 ft tall x 3 ft wide, full sun to partial shade.
